

22-23.11.2021

Sofia, Bulgaria

# HOLOTWIN Project Workshop

**Hybrid mode**

Microsoft and other major industries, holographic telepresence systems will be an essential component for realizing the concept of the **Metaverse**, which is seen as the Next Generation Internet. The workshop features renowned speakers and very interesting talks on (AR), (VR), (MR), (XR) real time mobile holograms; digital twins), as well as applications based on advance sensing, imaging, artificial intelligence (AI), and massive scale machine-to-machine (M2M) communications.
